Contents of Volume 13

NUMBER 1 JANUARY 1984

Editorial *1*

Energy-Dispersive X-Ray Fluorescence Analysis of Silicate Rocks for Major and Trace Elements *2*
P. J. POTTS, P. C. WEBB AND J. S. WATSON

Some Possibilities for the use of So-Called 'Differential' Correction Equations in X-Ray Fluorescence Analysis *16*
A. KUCZUMOW

Consideration of an Enhancement Effect Simplified Expression in Limiting Cases in X-Ray Fluorescence Analysis *23*
A. KUCZUMOW

Heterogeneity Effects in Direct X-Ray Fluorescence Analysis of Hair *27*
S. TÖRÖK, P. VAN DYCK AND R. VAN GRIEKEN

Limitations in the Use of the Peak-to-background Method for Quantitative Analysis *33*
P. REZ AND J. KONOPKA

Proton and Photon-Induced X-Ray Fluorescence Intensity from a Monolayer Sample of Complex Chemical and Granular Composition *38*
V. F. VOLKOV AND N. N. KRASNOPOLSKAYA

Measuring the Dead Time of an X-Ray Spectrometer by Means of the First- and Second-Order Reflections Method *44*
R. D. BONETTO AND J. A. RIVEROS

Reflective Properties of Beryl and Gypsum Crystals in the 1 keV Photon Energy Region *46*
E. BELIN, S. ZUCKERMAN AND C. SÉNÉMAUD

Short Communication

Normalization in X-Ray Microanalysis *49*
S. KAZIMIERZ

NUMBER 2 APRIL 1984

Editorial *51*

Theoretical Derivation of Fluorescent X-Ray Intensities in X-Ray Fluorescence Spectrochemical Analysis *52*
Z. LI-XING

Electron Ionization Cross-Sections for K, L and M Shells *55*
P. REZ

A Modification of Kramers' Law for the X-Ray Continuum from Thick Targets *60*
M. G. BRUNETTO AND J. A. RIVEROS

Trace Element Analysis of Silicates by Means of Energy-Dispersive X-Ray Spectrometry *64*
R. G. JOHNSON

Quantitative Light Element Analysis using an Energy Dispersive Detector: 1—Dead Time and the Low-Energy Spectrum *69*

D. J. BLOOMFIELD, G. LOVE AND V. D. SCOTT

Radiative Auger Transitions and their Consideration in Deconvolution of Energy Dispersive X-Ray Spectra *78*

E. MARAGETER, W. WEGSCHEIDER AND K. MÜLLER

Solvent Extraction-Microdroplet X-Ray Fluorescence Analyses of Trace Amounts of Heavy Metal Ions *83*

M. MURATA, M. OMATSU AND S. MUSHIMOTO

X-Ray Fluorescence Analysis of Iron Ore Concentrates *87*

S. TURMEL AND C. SAMSON

Evaluation of the Use of Gaussian $\phi(\rho z)$ Curves in Quantitative Electron Probe Microanalysis: a New Optimization *91*

G. F. BASTIN, F. J. J. VAN LOO AND H. J. M. HEIJLIGERS

NUMBER 3 JULY 1984

Editorial *99*

The Stopping-Power Correction in Proton-Induced X-Ray Emission Analysis *100*

N. A. DYSON AND H. FAKHOURI

Monte Carlo Simulation of the Backscatter Region in Energy-Dispersive X-Ray Fluorescence Spectra of Homogeneous Multi-Element Samples with an Application to Quantitative Analysis *103*

F. ARMÇ

Method of Spectral Background Evaluation Using Higher Energy Peaks in X-Ray Energy Analysis *110*

R. CIRONE, G. E. GIGANTE AND G. GUALTIERI

Fundamental Algorithm Between Concentration and Intensity in XRF Analysis: 1—Theory *115*

R. M. ROUSSEAU

Fundamental Algorithm Between Concentration and Intensity in XRF Analysis: 2—Practical Application *121*

R. M. ROUSSEAU

Sub-Surface Charging, a Source of Error in Microprobe Analysis *126*

J. GRAHAM, C. R. M. BUTT AND R. B. W. VIGERS

Spectral Intensity Distributions from X-Ray Tubes. Calculated Versus Experimental Evaluations *134*

R. TERTIAN AND N. BROLL

Routineverfahren zur Serienanalytik geologischen Materials mittels XRFS *142*

(Routine Procedure for the Sequential Analysis of Geological Materials using XRFS)

N. MÜLLER

NUMBER 4 OCTOBER 1984

Editorial *147*

Melted Sample (Glass Disk) Ageing and its Usability for X-Ray Emission Spectrometry *148*

VJ. NOVOSEL-RADOVIĆ, DA. MALJKOVIĆ AND N. NENADIĆ

CONTENTS OF VOLUME 13

Determination of the Ash Content of Coal by Multi-Element X-Ray Fluorescence Analysis *151*
B. DZIUNIKOWSKI AND A. STOCHALSKI

Study of Some Cobalt Biomolecular Complexes by X-Ray Absorption Spectroscopy *153*
S. CHATTOPADHYAY, V. B. SAPRE AND C. MANDE

X-Ray K Absorption Edges of Cobalt and Copper in their Tetraphenylporphyrin (TPP) and Formate Di- and Tetrahydrate (FDH) (FTH) Compounds *156*
O. P. RAJPUT, A. N. NIGAM, B. D. SHRIVASTAVA

Quantitative Analysis of Bulk Samples without Standards by Using Peak-to-Background Ratios *159*
J. HECKEL AND P. JUGELT

Theoretical Evaluation of the Efficiency of Compton Scattered Radiation Method in EDXRF Analysis *166*
A. MARKOWICZ

Non-Destructive Measurement of Gas Pressures in Sealed Halogen Lamps by X-Ray Spectrometry *170*
P. LUBLIN, F. PINK AND C. PERSIANI

PDIDENT—A Set of Programs for Powder Diffraction Phase Identification *172*
R. P. GOEHNER AND M. F. GARBAUSKAS

μ/ρ Algorithm valid for 1 keV$\leq E \leq$50 keV and 11$\leq Z \leq$83 *180*
J. WERNISCH, C. PÖHN, W. HANKE AND H. EBEL

A Fundamental Parameter Method for Measurement of the Thickness of Pure Element Films by an EDX Technique with a Proportional Detector *182*
H. TAKAGI, H. SHIMA, T. UI AND E. ASADA

Computer Method for Qualitative Wavelength Dispersive X-Ray Fluorescence Analysis *187*
E. VILA, J. BERMÚDEZ-POLONIO AND J. L. JIMÉNEZ-SECO

Compton Scattering of X-Rays: Some Observations *192*
H. D. PANDEY
